1. INTRODUCTION

The SR-720 PG2 is a full 2-way wireless PowerG indoor siren, designed for installation in areas in which wiring action is difficult or impossible.

Features

- **Siren and strobe light activation**: When an identified event message is received from the compatible PowerG alarm system, the siren activates its sounder & strobe light.
  - **Notes**: The sounder is activated for a predefined "Bell Time" (refer to the control panel Installer Guide), according to local authorities requirements, or until the system is disarmed, whichever occurs first.
  - The strobe light operates as described in the control panel Installer Guide.

- **Tamper indication**: In case of tamper while the system is armed, the siren transmits the message to the alarm system and then the alarm system determines whether the siren should be activated or not. If the siren does not receive an acknowledge message from the alarm system, the siren will function independently.

- **Low battery voltage alert**: When the battery voltage is low, a low battery message is sent to the alarm system. After the low voltage message delivery, at least 2 siren alarms are possible before the siren is totally inactive.

- **Power Supply**: Non-rechargeable battery.
- **Sound Types**: Burglar (between 1400Hz - 3200Hz), fire, gas/Co and flood.
- **Entry/Exit**: Exit delay beeps sound once the user has armed the system. Entry delay beeps sound once the user has entered the protected area. (Entry/exit beeps can be enabled / disabled from the control panel Installer menu.)
- **Squawk indications**: Squawk (beep) sounds can be used to indicate alarm system arming (1 squawk) and disarming (2 squawks) by a keyfob (squawk can be enabled from the control panel User menu).
- **Double Tamper protection**: When the siren front panel is removed or when the siren is removed from the wall, tamper alarm is sent to the alarm system.
- **2-way full supervision**: The siren is a fully supervised, 2-way communication device. It includes a receiver, to receive event messages from the alarm system, and a transmitter, to periodically transmit its status signal to the alarm system.

Self-test feature

Upon pressing the self test switch, siren functional check is performed - low level sounds and flash light indicate that the siren is serviceable.

2. INSTALLATION

2.1 Installation

1. Open plastic cover screw.
2. Using Philips screwdriver, remove screw and remove cover.
3. Mark for drilling.
4. Drill 4 holes.
5 Fasten with 4 screws.
   - A. Mounting surface.
   - B. For back tamper screw.

C. Battery connector
D. Enroll button
E. Self test switch
F. Battery
G. Battery cable

Figure 3: Battery Pack Insertion

2.3 Cover Closure

See Figure 4.
1. Put back the plastic cover.
2. Secure with screw.

Figure 4 - Cover Closure

CAUTION!
Risk of explosion if battery is replaced by an incorrect type. Dispose of used battery according to manufacturer's instructions.

3. ENROLLMENT

Refer to the control panel Installer Guide for the device enrollment procedure.

4. SR-720 PG2 DEVICE SETTINGS

This section describes how to configure the parameters of the siren from the control panel.

To Modify the Siren Device Settings

Refer to the control panel Installer Guide and perform the procedure for Adding A Wireless Device (section 4.5.2), or, Modifying a Device (section 4.5.5). Then continue below to modify the device settings.

Here you determine whether or not to activate the strobe alarm, and if to activate whether to activate the strobe until the alarm system is disarmed, or, for the programmed period of time (see section "Siren Configuration" in the control panel Installer Guide).

Select between "Timer limited", "Disabled" and "Until Disarmed".

Here you determine whether or not to activate the exit – entry beeps, and if enabled, whether to activate in HOME or AWAY mode.

Select between "Disabled", "Disabled & Home" and "Enabled".
Here you determine whether or not to activate the squawk, and if enabled, whether to activate the sounder only, or, the sounder and strobe simultaneously.

Select between "Disabled", "Sounder only", "Strobe only" and "Sounder+strobe".

Here you determine the volume level of the sounder.

Select between "Volume HIGH", "Volume LOW" and "Volume MID".

Here you determine whether or not the siren alone will sound a tamper alarm when there is no communication between the siren and the control panel.

Select between "Disabled" and "Enabled".

When exiting "INSTALLLER MODE" menu, the alarm system displays the number of devices that need to be updated, as follows: "DEV UPDATING NNN". For detailed instructions on Adding Devices, Deleting Devices, Replacing Devices and Defining Defaults see the control panel Installer Guide.

### 5. LOCAL DIAGNOSTICS TEST

Before testing, remove the plastic cover and then open the battery cover (see Fig. 2).

A. Press the self-test button (see Fig. 3) once and release it; the following procedure should occur in turn:

- The red LED will switch ON and then OFF, the green LED will switch ON and then OFF, the strobe light will switch ON and then OFF and the piezo siren will sound to indicate that the siren is now fully operational.

B. After 2 seconds the LED blinks 3 times.

The following table indicates received signal strength indication.

<table>
<thead>
<tr>
<th>LED response</th>
<th>Reception</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green LED blinks</td>
<td>Strong</td>
</tr>
<tr>
<td>Orange LED blinks</td>
<td>Good</td>
</tr>
<tr>
<td>Red LED blinks</td>
<td>Poor</td>
</tr>
<tr>
<td>No blinks</td>
<td>No communication</td>
</tr>
</tbody>
</table>

**IMPORTANT!** Reliable reception must be assured. Therefore, "poor" signal strength is not acceptable. If you receive a "poor" signal from the device, re-locate it and re-test until a "good" or "strong" signal strength is received.

**Note:** For detailed Diagnostics Test instructions refer to the control panel Installer Guide.

### 6. COMPLIANCE WITH STANDARDS

**Compliance with Standards**

**Europe:** EN50131-1 Grade 2 Class 2, EN 50131-4, EN 301489, EN 50130-4, EN 50130-5, EN 300 220, EN 60950-1, EN 60950-22

Certified by the Dutch testing and certification body Telefication BV.

**USA:** CFR 47 Part 15 (FCC)

**Canada:** RSS 210

The Power G peripheral devices have two-way communication functionality, providing additional benefits as described in the technical brochure. This functionality has not been tested to comply with the respective technical requirements and should therefore be considered outside the scope of the product’s certification.

**EN 50131-1 Security Grade**
- Grade 2

**EN 50131-1 Environmental Class**
- Class 2
The digital circuit of this device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in residential installations. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio and television reception. However, there is no guarantee that interference will not occur in a particular installation. If this device does cause such interference, which can be verified by turning the device off and on, the user is encouraged to eliminate the interference by one or more of the following measures:

- Re-orient or re-locate the receiving antenna.
- Increase the distance between the device and the receiver.
- Connect the device to an outlet on a circuit different from the one which supplies power to the receiver.
- Consult the dealer or an experienced radio/TV technician.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authorities to operate the equipment.

WARNING! Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The technical documentation as required by the European Conformity Assessment procedure is kept at:

WEEE Product Recycling Declaration
For information regarding the recycling of this product you must contact the company from which you originally purchased it. If you are discarding this product and not returning it for repair then you must ensure that it is returned as identified by your supplier. This product is not to be thrown away with everyday waste.

7. SPECIFICATIONS

Frequency Band (MHz): Europe: 433, 868, USA: 915
Modulation: GFSK
Antenna: Built-in antenna
Communication Protocol: PowerG
Siren Type: One Piezo 109 db min. Sound Pressure Level @ 1m, 1400Hz – 3200 Hz, sweep frequency 7 Hz.
Battery Type: 3.6V/14.5A/H Lithium battery (EVE ER34615Mw200), Visonic assembly cat. No. 0-9912-K.
Note: Use only the above battery.

WARRANTY
Visonic Limited (the “Manufacturer”) warrants this product only (the “Product”) to the original purchaser only (the “Purchaser”) against defective workmanship and materials under normal use of the Product for a period of twelve (12) months from the date of shipment by the Manufacturer. This Warranty is absolutely conditional upon the Product having been properly installed, maintained and operated in accordance with the Manufacturer's installation and operation instructions. Products which have become defective for any reason, according to the Manufacturer's discretion, such as improper installation, failure to follow recommended installation and operational instructions, neglect, willful damage, misuse or vandalism, accidental damage, alteration or tampering, or repair by anyone other than the manufacturer, are not covered by this Warranty. The Manufacturer does not represent that this Product may not be compromised and/or circumvented or that the Product will prevent any death and/or personal injury and/or damage to property resulting from burglary, robbery, fire or otherwise, or that the Product will in all cases provide adequate warning or protection. The Manufacturer shall in no event be liable for any direct, indirect, incidental, consequential or special damages or loss whatsoever, whether directly, indirectly, incidentally, consequentially or otherwise, caused by the Product or its whole system at least once a week and to take all necessary precautions for his/her safety and the protection of his/her property.

This Warranty is in addition to and does not affect your legal rights. Any provision in this warranty which is contrary to the Law in the state or country were the Product is supplied shall not apply.

Warning: The user must follow the Manufacturer’s installation and operational instructions including testing the Product and its whole system at least once a week and to take all necessary precautions for his/her safety and the protection of his/her property.
